

DishaSetu AI

Innovation & Differentiation Note

What Makes DishaSetu AI Different?

DishaSetu AI connects career readiness with recruitment instead of treating job search, skill development and interview preparation as separate activities.

TRADITIONAL APPROACH

DISHASETU AI

1. Readiness-First Approach

DishaSetu focuses on preparing candidates for opportunities, not only helping them discover jobs.

2. Skill-Based Opportunity Connection

Organizations define required skills and candidates can understand their match and missing skills before applying.

3. Connected Employability Journey

Assessment, skill gaps, learning, verification, interview preparation and opportunities are connected.

4. Two-Sided Skill Ecosystem

Candidate readiness and organization requirements are connected through skill-based matching.

How DishaSetu AI Differs

AREA	CONVENTIONAL APPROACH	DISHASETU AI
Primary Focus	Job discovery and applications	→ Career readiness + opportunity connection
Candidate Understanding	Resume/profile focused	→ Skills + gaps + readiness
Skill Gap	Often external/manual	→ Integrated Skill Gap Analysis
Career Preparation	Separate from job search	→ Connected roadmap and preparation
Interview Preparation	Often separate	→ Integrated AI Mock Interview
Opportunity Fit	Job description + profile	→ Match + missing skill visibility
Organization Workflow	Post job + receive applications	→ Define skills + matching + evaluation
Overall Model	Application-centric	→ Readiness + matching + recruitment ecosystem

DishaSetu AI connects the candidate's journey toward readiness with the organization's need for skill-aligned recruitment.

The Core DishaSetu AI Differentiator

- Career readiness and recruitment are connected in one ecosystem.
- Skill gaps are converted into an actionable preparation path.
- Candidates can understand opportunity fit before applying.
- Organizations can define role-specific skill requirements for skill-based matching.

"From Skill Gap to Job Readiness to Opportunity."
