Problem Statement & Proposed Solution

The Problem We Are Solving

There is a persistent gap between academic education, actual skill readiness, and industry employment requirements.

CANDIDATE PROBLEM

Students may complete their academic education but still face uncertainty about:

- What actionable skills they currently possess beyond their degree.
- Which specific skills are missing for their target career.
- How industry requirements compare with their current capabilities.
- Whether their resume effectively represents their skills.
- How to prepare for role-specific technical and HR interviews.
- Which opportunities actually match their capabilities.
- Why they do or do not match a particular opportunity.

ORGANIZATION PROBLEM

Organizations and recruiters may face:

- Large and diverse applicant pools.
- Candidates with different skill levels and backgrounds.
- Difficulty identifying candidates with relevant skills.
- Difficulty comparing candidates against role-specific requirements.
- Need for structured candidate evaluation.
- Difficulty connecting job requirements with candidate readiness.

Root Causes & Problem Breakdown

CANDIDATE SIDE

1. Skill Visibility Gap

Candidates may not clearly understand their current skill strengths and weaknesses.

2. Skill Gap Awareness Gap

Candidates may not know which skills are missing for their target role.

3. Career Direction Gap

Candidates may lack a structured path connecting their current state to their desired career.

4. Preparation Gap

Resume and interview preparation can remain disconnected from actual role requirements.

5. Opportunity Matching Gap

Candidates may see opportunities without understanding how closely their skills match requirements.

ORGANIZATION SIDE

1. Requirement-to-Candidate Gap

Job requirements and candidate capabilities are not always connected through a structured skill view.

2. Candidate Evaluation Gap

Recruiters may need to compare candidates against different role-specific requirements.

3. Recruitment Structure Gap

Applications, evaluation and shortlisting can become difficult when requirements vary by role.

INDUSTRY REQUIREMENTS

SKILL GAP

CANDIDATE + ORGANIZATION CHALLENGES

How DishaSetu AI Addresses the Problem

Instead of treating career preparation and recruitment as separate activities, DishaSetu AI connects them into one integrated employability ecosystem.

CANDIDATE SOLUTION

ORGANIZATION SOLUTION

ADMIN

Admin provides platform-level management for:

Problem → Solution Mapping

IDENTIFIED PROBLEM	DISHASETU AI RESPONSE
Skill readiness is unclear	→ Skill Assessment + Profile Intelligence
Candidates don't know their missing skills	→ Skill Gap Analysis
Candidates lack a structured career path	→ Personalized Career Roadmap
Resumes may not effectively represent candidates	→ Resume Intelligence + ATS Analysis
Interview preparation is fragmented	→ AI Mock Interview
Candidates don't understand job fit	→ Match / Missing Skill visibility prior to applying
Organizations struggle to identify relevant candidates	→ Skill-based Opportunity Matching
Organizations need structured evaluation	→ AI-Assisted Candidate Evaluation
Different organizations have different requirements	→ Organization-specific Opportunities + Required Skills

THE CORE SOLUTION

Skills → Readiness → Opportunities → Employment

ROLE OF AI

AI contributes to:

- Resume Intelligence / ATS
- Skill Gap Analysis
- Career Guidance
- AI Mock Interviews
- Opportunity Matching
- AI-assisted Candidate Evaluation

AI is combined with deterministic backend logic for consistency and validation.

EXPECTED OUTCOMES

FOR CANDIDATES

- Better awareness of skill gaps
- Structured career preparation
- Better interview readiness
- More informed opportunity discovery

FOR ORGANIZATIONS

- Better visibility into candidate skills
- More structured applications
- Skill-based candidate comparison
- AI-assisted evaluation and workflow

DishaSetu AI connects what candidates know, what they need to learn, and what organizations require.
