

SOLUTION PRESENTATION

DishaSetu AI

AI-Powered Career Readiness & Employability Platform

"Bridging Campus to Corporate"

MP ONLINE IDEA & INNOVATION HACKATHON 2026

The Problem

1 Candidate Side

- Gap between academic education and industry requirements
- Difficulty understanding actual skill readiness
- Difficulty identifying specific missing skills
- Weak or poorly optimized resumes
- Lack of structured interview preparation
- Difficulty finding relevant opportunities and understanding match

2 Organization Side

- Overwhelmed by a large volume of applications
- Receiving candidates with vastly varying skill levels
- Difficulty identifying candidates with true relevant skills
- Difficulty comparing candidates against exact requirements
- Lack of structured, AI-assisted evaluation methods

Our Solution

DishaSetu AI connects career preparation and recruitment into an integrated ecosystem, replacing the fragmented job portal approach.

INSTEAD OF TRADITIONAL PROCESS:

Student → Resume → Search Jobs → Apply

DISHASETU AI CANDIDATE JOURNEY:

DISHASETU AI ORGANIZATION JOURNEY:

Candidate Experience

1. Assess & Identify

Candidates gain absolute clarity on their baseline skills and map exact gaps against target roles using deterministic engines.

2. Learn & Prepare

Actionable sprint roadmaps direct learning. AI Mock Interviews simulate high-pressure scenarios for complete readiness.

3. Match & Apply

Candidates preview their precise match score before applying, ensuring high relevance and confident applications.

Organization / Recruiter Experience

A Multi-Tenant Ecosystem

Multiple organizations operate natively on the platform. Each maintains:

- Distinct organization profiles and branding
- Multiple curated opportunities
- Unique, tailored skill requirements per role
- Isolated applicant pools and workflows

Transparent Alignment

Candidates transparently understand their match percentage and missing skills *before* they apply. Organizations receive a highly qualified, skill-aligned applicant pipeline evaluated deterministically.

AI Intelligence & Architecture

1 Resume Intelligence & ATS

- Deep resume understanding and parsing
- Skill/career information extraction
- ATS compatibility analysis
- Missing keyword identification
- Actionable bullet improvement suggestions

2 Skill Gap Analysis

- Compares capabilities against target requirements
- Categorizes strong, moderate, and missing skills
- Powers deterministic roadmap generation

3 AI Mock Interview

- Role-relevant dynamic interview interactions
- Technical & HR preparation scenarios
- Real-time comprehensive response evaluation

4 Smart Opportunity Matching

- Compares candidate skills with organization-defined requirements
- Fully explainable match scoring & missing skill alerts

Innovation & Differentiation

THE KEY INNOVATION

A Three-Sided Ecosystem

We visualize employability not as isolated portals, but as one unified, transparent ecosystem connecting all stakeholders.

1

Candidate

- Build & optimize skills
- Identify precise gaps
- Prepare for interviews
- Apply with confidence

2

Organization

- Define core requirements
- Discover verified candidates
- Evaluate deterministically
- Recruit efficiently

3

Platform Admin

- Manage users natively
- Manage organizations
- Manage opportunities
- Platform oversight & health

The Intelligence Loop

The system creates a continuous, dynamic connection between candidate development and actual employment through an automated intelligence loop.

Technology & Architecture

Impact & Scalability

Candidate Impact

- Better understanding of skill gaps
- Personalized career direction
- Better interview preparation
- Improved job readiness
- More relevant opportunities

Organization Impact

- Skill-based candidate discovery
- Structured application tracking
- AI-assisted candidate evaluation
- Organized recruitment cycles

Ecosystem Impact

- Better education-industry alignment
- Stronger employability pathways bridging the gap

Platform Scalability

- Support for multiple organizations
- Scalable to thousands of opportunities
- Dynamic, different skill requirements
- Highly expandable candidate ecosystem
- Ready for institutional/employability ecosystem integrations

DishaSetu AI transforms career preparation from a simple job-search process into a structured journey from:

Skills → Readiness → Opportunities → Employment

ONE-LINE SOLUTION STATEMENT

"DishaSetu AI is an AI-powered employability platform that helps candidates identify skill gaps, build job-ready capabilities, prepare for interviews, and connect with relevant opportunities while enabling organizations to discover and evaluate candidates based on their skills."

BRIDGING CAMPUS TO CORPORATE
